

COTTONWOOD WATER & SANITATION DISTRICT
(CWSD)

BOARD MEMBER Alyssa Kasaris

Position: Director

Term: Through May, 2014

Alyssa is a long-time resident (since 1986). She chose to be involved in the Cottonwood Water & Sanitation District to reach out to other water consumers on the educational aspects of exploring the challenges and opportunities in managing the area's water resources. Alyssa believes a better understanding of being water-efficient (not just in individual usage, but in the District's operation and management) also helps to uphold everyone's property values.

With a degree in business administration from the University of Denver, Alyssa's background in communications and leadership development facilitates a strong team environment in which to discuss best options for the area's water availability, treatment and quality control. The five member Board is also working on future access to a renewable and abundant water supply for Cottonwood customers managed by fiscal responsibility.

Alyssa's additional community service projects includes working with a certified therapy dog for personal visitation and healing experiences at Memory Loss Care Units, children's functions and Veteran centers.
