

# **Mandatory Water Restrictions**

## **Water Conservation Stage 2**

Each year water use varies substantially depending on weather conditions. This year, the Cottonwood Water and Sanitation District (“Cottonwood”) has already experienced extraordinary hot and dry conditions for a period of time. Cottonwood’s water supply is limited and hence the Board of Directors has adopted a Water Conservation Stage 2 restriction on outdoor watering. These restrictions apply to all Cottonwood customers. The following outdoor water restrictions are in effect from June 16, 2020 through October 15, 2020.

### **COTTONWOOD WATER CONSERVATION STAGE 2 PRACTICES**

1. No operation of irrigation systems or hose-end sprinklers is allowed after 9:00 a.m. and before 6:00 p.m.
2. Watering by sprinkler or irrigation systems is allowed on Customers’ assigned day only after 6:00 p.m. and before 9:00 a.m. Hand watering is permitted at any time;
3. Customers establishing a new turf planted on or after June 16, 2020, please contact Cottonwood for a New Turf Variance (“NTF”). NTFs will be issued for a period not-exceed 30 days;
4. Customers’ assigned days are as follows:
  - Odd addresses: Monday, Wednesday and Saturday;
  - Even addresses: Tuesday, Thursday and Sundays;

### **CWSD Water-Efficient Landscape Best Practices**

- Help prevent water from pooling in gutters and streets
- Avoid watering landscape during rain or 24-hours after
- Sweep off, rather than watering away, landscape materials from paved surfaces
- Eliminate water waste resulting from inefficient landscape irrigation and run off
- Best to use a commercial car wash and if hand-washing use a bucket or a hand-held hose with a shut-off nozzle
- Repair all water leaks within 48-hours

### **Fines for Violation of Water Conservation Policy**

First violation	Warning
Second violation at the same premises or by the same user	\$100
Third violation	\$250
Fourth or any Subsequent Violations	\$500
