Cottonwood
Water & Sanitation District

Water Conservation Workshop

Colorado is a dry climate with limited water supplies. Cottonwood Water encourages water conservation through rebates on water conserving appliances (<https://www.cottonwoodwater.org/rebates/>), participation in the Garden in a Box program, tiered water rates, and recommended 3 day a week watering programs.

To provide additional information on water conservation, the District is scheduling a workshop for Saturday, July 20th at 10:00am at the District meeting house located at 8334 Sandreed Circle. This workshop will provide information on water conservation. The workshop is free, however, we need participants to make reservations for the event. Please RSVP to kelly@mulhernmre.com or call the District office at 303-792-9509. Saving water saves money!

Douglas County Household Chemical Roundups

For years, Cottonwood Water has partnered with the Tri-County Health Department serving Adams, Arapahoe and Douglas Counties, in sponsoring the Household Chemical Roundups. These Roundups help dispose of chemical waste properly, prevent pollution and protect the people handling our garbage. When household chemicals are not used up, they must be disposed of properly or it can harm to sanitation workers, create problems in sewage treatment plants and landfills or affect water and air quality. There are 2 locations coming up in August and September listed below.

Please bring \$25 per vehicle & proof of residency to the drop off site. For a list of acceptable items please visit www.tchd.org/hcroundup or call 303-846-6249.

Have a safe & Happy 4th!
